

# We're setting the gold standard for data security

**The security of our members' data is our #1 priority. Here are just a few of the steps we've taken to ensure data security.**

- Encrypted all employee laptops and corporate data storage systems at rest
- Encrypted all server communications in transit
- Employed a 3rd party external network auditor (certification from Kanda available)
- Secured information with next-generation Palo Alto firewall
- Shredded all storage media once retired (3rd party certificates upon request)

**We've also published a suite of Information Security Policies that are available upon request. Policies include:**

- Access control
- Business continuity
- Change control policy
- Backup and recovery
- Data handling & storage
- Information security
- Acceptable usage
- Patch management
- Information classification and handling
- Data breach
- Technical and organizational measures
